Check

Message Filtering

- 1 ☒ Element `form` not allowed as child of element `ul` in this context. (Suppressing further errors from this subtree.)
- 2 ☒ An `input` element with a `type` attribute whose value is `hidden` must not have an `autocomplete` attribute whose value is `on` or `off`. (2)
- 3 ☒ No `p` element in scope but a `p` end tag seen.

- 1 ☒ The `type` attribute is unnecessary for JavaScript resources. (2)
- 2 ☒ Section lacks heading. Consider using `h2`–`h6` elements to add identifying headings to all sections, or else use a `div` element instead for any cases where no heading is needed. (2)
- 3 ☒ Consider using the `h1` element as a top-level heading only (all `h1` elements are treated as top-level headings by many screen readers and other tools).

- Warning

The `type` attribute is unnecessary for JavaScript resources.

[From line 20, column 9: to line 20, column 39](#)

><...<script type="text/javascript"><
